CONTENTS

NUMBER 1

	1	The T. P. Hoar Prize for 1987
	5	The U. R. Evans Award for 1988
C. Deslouis, M. Duprat and Chr. Tournillon	13	The kinetics of zinc dissolution in aerated sodium sulphate solutions. A measurement of the corrosion rate by impedance techniques
J. N. Harb and R. C. Alkire	31	The effect of fluid flow on growth of single corrosion pits
J. A. A. Crossley and J. C. Rivière	45	An XPS and XAES study of the nature of the metal/scale interface in air-oxidized Fe/1.0^{w}/$_{o}$Si alloy
C. L. Briant	53	On the role of phosphorus in the caustic stress corrosion cracking of low alloy steels
M. Saenz de Santa Maria and A. Turnbull	69	The effect of H_2S concentration and pH on the cracking resistance of AISI 410 stainless steel in 5% brine
A. Turnbull, M. Saenz de Santa Maria and N. D. Thomas	89	The effect of H_2S concentration and pH on hydrogen permeation in AISI 410 stainless steel in 5% NaCl
S. Feliu, J. A. González, M. C. Andrade and V. Feliu	105	Determining polarization resistance in reinforced concrete slabs
	115	Corrosion Diary

NUMBER 2/3

R. A. Oriani and H. J. Engell	117	Introduction
H. J. Engell and R. A. Oriani	119	Report on workshop group deliberations and discussions
Section 1: *Formation of Passive Layers*		
K. E. Heusler	131	The influence of electrolyte composition on the formation and dissolution of passivating films
J. Kruger	149	The nature of the passive film on iron and ferrous alloys
S. Haupt and H.-H. Strehblow	163	Combined electrochemical and surface analytical investigations of the formation of passive layers
R. Kirchheim	183	The growth kinetics of passive films and the role of defects
H. Gerischer	191	Remarks on the electronic structure of the oxide film on passive iron and the consequences for its electrode behaviour
Section 2: *Properties of Passive Layers*		
M. H. Dean and U. Stimming	199	The electronic properties of disordered passive films
J. W. Halley	213	Theoretical issues in electronic structure of the passivation layer
E. Leiva, P. Meyer and W. Schmickler	225	Electron transfer through passive films: role of localized electronic states
A. T. Fromhold Jr and S. J. Noh	237	The transport of ions and electrons through microscopically inhomogeneous passive films: breakdown implications
H. Gerischer	257	Models for the discussion of the photo-electrochemical response of oxide layers on metals
W. J. Plieth and H.-J. Rieger	267	Investigation of passive films with laser pulses
K. Jüttner, W. J. Lorenz and W. Paatsch	279	The role of surface inhomogeneities in corrosion processes—electrochemical impedance spectroscopy (EIS) on different aluminium oxide films

Section 3: Breakdown and Repair of Passive Layers

J. O'M. Bockris	291	Spectroscopic observations on the nature of passivity
H. S. Isaacs	313	The localized breakdown and repair of passive surfaces during pitting
H. W. Pickering	325	The significance of the local electrode potential within pits, crevices and cracks
L. Elfenthal, J. W. Schultze and O. Meyer	343	The simulation of radiation damage in oxide films by ion implantation
M. Baumgärtner and H. Kaesche	363	Microtunnelling during localized attack of passive aluminum: the case of salt films vs oxide films
F. Beck	379	The wear mechanism of activated titanium anodes under current flow
	389	Corrosion Diary

NUMBER 4

E. McCafferty	391	Thermodynamic aspects of the crevice corrosion of iron in chromate/chloride solutions
A. M. Beccaria, P. Fiordiponti and G. Mattogno	403	The effect of hydrostatic pressure on the corrosion of nickel in slightly alkaline solutions containing Cl^- ions
F. Zucchi, G. Trabanelli, G. Rocchini and G. Perboni	417	The stress corrosion cracking of sensitized austenitic stainless steels in chloride solutions at 80°C
C. A. Gervasi, S. R. Biaggio, J. R. Vilche and A. J. Arvia	427	The electrochemical behaviour of cobalt in carbonate–bicarbonate solutions
A. M. Shams el din and R. A. Arain	445	The kinetics of oxygen scavenging by catalysed hydrazine
P. Marcus and H. Talah	455	The sulphur-induced breakdown of the passive film and pitting studied on nickel and nickel alloys
R. Prescott, F. H. Stott and P. Elliott	465	The degradation of metals in a hydrogen chloride-containing gas at high temperature
	477	Announcements
	481	Corrigendum
	483	Corrosion Diary

NUMBER 5

Su-Il Pyun and R. A. Oriani	485	The permeation of hydrogen through the passivating films on iron and nickel
R. E. van de Leest	497	The indoor exposure of thin sputtered copper–aluminium films
R. E. van de Leest	507	Atmospheric corrosion of thin sputtered copper–chromium films
K. Rippstein and H. Kaesche	517	The stress corrosion cracking of a reactor pressure vessel steel in high temperature water at high flow rates
L. A. Kamel, S. M. Roshdy and R. Abou Shahba	535	The behaviour of chromium amalgams in oxalic acid solutions
R. Beneke and R. F. Sandenbergh	543	The influence of nitrogen and molybdenum on the sensitization properties of low-carbon austenitic stainless steels
Zuo Jingyi, Marcel Pourbaix, Xu Chunchun and Liu Youping	557	Kinetic and thermodynamic behaviour inside occluded corrosion cells interpreted by potential/pH diagrams

T. MAGNIN, D. DESJARDINS and M. PUIGGALI	567	The influence of the mechanical test conditions on the corrosion fatigue behaviour of austenitic stainless steel in chloride solutions
T. Y. CHEN and Z. SZKLARSKA-SMIALOWSKA	577	General corrosion of B-strengthened Ni- and Fe-based microcrystalline alloys in de-aerated 1 M HCl solution
J. E. CASTLE and J. H. QIU	591	A co-ordinated study of the passivation of alloy steels by plasma source mass spectrometry and X-ray photoelectron spectroscopy—I. Characterization of the passive film
J. E. CASTLE and J. H. QIU	605	A co-ordinated study of the passivation of alloy steels by plasma source mass spectrometry and X-ray photoelectron spectroscopy—II. Growth kinetics of the passive film
	617	Announcements
	621	Corrosion Diary

NUMBER 6

T. N. RHYS-JONES	623	Coatings for blade and vane applications in gas turbines
D. J. STEPHENSON	647	Predicting the high temperature erosion behaviour of materials used in gas turbines
P. HANCOCK	657	The influence of environment on the fatigue behaviour of superalloy components at high temperatures
K. N. STRAFFORD, P. K. DATTA, A. F. HAMPTON and P. MISTRY	673	The influence of minor additions of the reactive elements Al, Zr, Hf or Si on the corrosion of Ni–Cr alloys in an oxygen–sulphur environment at 700°C
K. N. STRAFFORD, P. K. DATTA and G. FORSTER	703	The high temperature chloridation of iron, nickel and some iron–nickel model alloys
B. S. TERRY, J. WRIGHT and D. J. HALL	717	A model for prediction of carburization in steels for ethylene production furnaces
P. S. SIDKY and M. G. HOCKING	735	The effect of pre-oxidation and thermal cycling on the corrosion behaviour of Fe–Cr–Al-based alloys in a coal gasifier atmosphere
P. K. DATTA, K. N. STRAFFORD, J. S. GRAY, C. GILL and R. J. FORDHAM	767	The influence of impurities and sintering additives on the sulphidation/oxidation behaviour of nitrogen ceramics
K. N. STRAFFORD, P. K. DATTA, A. F. HAMPTON, F. STARR and W. Y. CHAN	775	The influence of additions of refractory elements on the sulphidation behaviour of cobalt-based alloys
T. R. GRIFFITHS	791	Studying hot corrosion with electronic absorption spectroscopy
	805	Announcements
	807	Corrigendum
	809	Corrosion Diary

NUMBER 7

G. L. McIntire and T. K. Hatwar	811	The corrosion protection behaviour of aluminum nitride and silicon dioxide coatings on magneto-optical media
G. K. Dey, R. T. Savalia, S. K. Sharma and S. K. Kulkarni	823	Corrosion studies on amorphous and crystalline $Zr_{67}Ni_{33}$
S. B. Lyon and F. A. El-Gbar	833	Electrochemical detection of hydrogen using a solid-state probe
F. I. Wei and F. H. Stott	839	The development of Cr_2O_3 scales on iron–chromium alloys containing reactive elements
Y. C. Lu, C. R. Clayton and A. R. Brooks	863	A bipolar model of the passivity of stainless steels—II. The influence of aqueous molybdate
C. R. Clayton and Y. C. Lu	881	A bipolar model of the passivity of stainless steels—III. The mechanism of MoO_4^{2-} formation and incorporation
R. Kirchheim, B. Heine, H. Fischmeister, S. Hofmann, H. Knote and U. Stolz	899	The passivity of iron–chromium alloys
Book Reviews		
J. C. Scully	919	A Bibliography of Books on Corrosion and Protection of Metals
J. C. Scully	920	Encyclopedia of Materials Science and Engineering, Supplementary Volume 1
J. C. Scully	921	DECHEMA Corrosion Handbook, Volume 1
	925	Corrosion Diary

NUMBER 8

Y. C. Lu and C. R. Clayton	927	An XPS study of the passive and transpassive behavior of molybdenum in deaerated 0.1 M HCl
L. Tomlinson and N. J. Cory	939	Hydrogen emission during the steam oxidation of ferritic steels: kinetics and mechanism
B. R. W. Hinton and L. Wilson	967	The corrosion inhibition of zinc with cerous chloride
R. Qvarfort	987	Critical pitting temperature measurements of stainless steels with an improved electrochemical method
R. J. Brigham	995	Crevice corrosion initiation and the potential of zero charge
R. B. Rebak and J. R. Galvele	1003	Stress corrosion cracking of α-brass in phosphate, triphosphate and pyrophosphate solutions
R. N. Parkins	1019	The application of stress corrosion crack growth kinetics to predicting lifetimes of structures
G. W. Walter and M. A. D. Madurasinghe	1039	Corrosion rates from low polarization data calculated by a galvanostatic, non-linear curve fitting method
	1057	Corrosion Diary

NUMBER 9

M. F. Stroosnijder and W. J. Quadakkers	1059	A corrosion study of Ni and Ni–Cr alloys in $SO_2/H_2O/H_2$ atmospheres using gas analysis
N. Pebere, Th. Picaud, M. Duprat and F. Dabosi	1073	Evaluation of corrosion performance of coated steel by the impedance technique
D. Boomer, R. Hermann and A. Turnbull	1087	Refilming kinetics of scraped steel electrodes in simulated corrosion fatigue crack-tip environments
K. Kurosawa and T. Fukushima	1103	Effects of pH of an Na_2MoO_4–H_3PO_4 type aqueous solution on the formation of chemical conversion coatings on steels
D. W. Shoesmith, S. Sunder, M. G. Bailey and G. J. Wallace	1115	The corrosion of nuclear fuel (UO_2) in oxygenated solutions
M. C. Alonso and M. C. Andrade	1129	The electrochemical behaviour of steel reinforcements in Na_2CO_3 and $NaHCO_3$ solutions in relation to stress corrosion cracking
M. S. De Sá and A. A. Berezin	1141	The application of catastrophe theory to corrosion problems
S. M. Sharland, C. P. Jackson and A. J. Diver	1149	A finite-element model of the propagation of corrosion crevices and pits
J. Dünnwald and A. Otto	1167	An investigation of phase transitions in rust layers using Raman spectroscopy
	1177	Corrosion Diary

NUMBER 10

L. Volpe and P. J. Peterson	1179	The atmospheric sulfidation of silver in a tubular corrosion reactor
D. M. Dražić and V. Vaščić	1197	The correlation between accelerated laboratory corrosion tests and atmospheric corrosion station tests on steels
W. M. Carroll and T. G. Walsh	1205	The influence of pH, temperature and surface pretreatments on the stability of passive films formed on Sanicro 28 and 5R60 stainless steels in aqueous chloride solutions
Deo Nath and T. K. G. Namboodhiri	1215	Some corrosion characteristics of aluminium–mica particulate composites
Short Communications		
P. R. Roberge, R. Beaudoin and V. S. Sastri	1231	Electrochemical noise measurements for field applications
H. Shih and F. Mansfeld	1235	A fitting procedure for impedance data of systems with very low corrosion rates
T. E. Eriksen, P. Ndalamba and I. Grenthe	1241	On the corrosion of copper in pure water
J. Yahalom	1251	In memoriam: Dr A. E. Yaniv
	1253	Corrosion Diary

NUMBER 11/12

J. C. Scully	1255	Editorial
R. Schrebler, H. Gómez, R. Córdova and I. Gardiazábal	1257	The influence of iodine in the electroformation of ZrO_2 films on Zircaloy-4 electrodes in acid solutions
M. J. Danielson and D. R. Baer	1265	The effects of sulfur on the dissolution of nickel
J. Robertson	1275	The mechanism of high temperature aqueous corrosion of steel
A. Higginson, R. C. Newman and R. P. M. Procter	1293	The passivation of Fe–Cr–Ru alloys in acidic solutions
Hiroki Habazaki, Shao-Qien Ding, Asahi Kawashima, Katsuhiko Asami, Koji Hashimoto, Akihisa Inoue and Tsuyoshi Masumoto	1319	The anodic behavior of amorphous Ni–19P alloys in different amorphous states
M. Stratmann and K. Hoffmann	1329	*In situ* Mößbauer spectroscopic study of reactions within rust layers
M. J. Justo and M. G. S. Ferreira	1353	The corrosion of mild steel in simulated SO_2 containing atmospheres
G. Hultquist, G. K. Chuah and K. L. Tan	1371	Comments on hydrogen evolution from the corrosion of pure copper
Short Communication		
D. Shukla and U. Stimming	1379	Photoelectrochemical study of passive films on aluminum
	1383	Corrosion Diary
